

STILLWATER FIRE TOWER

Logo

Jill Shaver Lamere

Stillwater Fire Tower sits on the summit of Stillwater Mountain at an elevation of 2264 feet. Recent documentation verifies that a NYS Adirondack Survey signal tower was built here by Verplanck Colvin in 1882. This established Stillwater Mountain as a Primary Triangulation Station. Stillwater Fire Tower was listed on the NYS & National Historic Registries in 2017. The present 1919 tower was closed in 1988 and reopened in 2016.

Restoration of the tower began in 2009 as a partnership between the New York State Department of Environmental Conservation and a 501(c)(3) tax exempt volunteer group:
